## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

A) A multivalent MHC fusion complex comprising two or more linked MHC fusion complexes wherein the MHC fusion complex contains or does not contain the transmembrane and cytoplasmic domains of the MHC molecule. Applicant is required to specify whether the elected complex contains or does not contain the transmembrane and cytoplasmic domains of the MHC molecule.

B) A multivalent MHC fusion complex comprising two or more linked MHC fusion complexes wherein the MHC fusion complex is or is not linked to an immunoglobulin. Applicant is required to specify whether the elected complex is or is not linked to an immunoglobulin. If a complex linked to an immunoglobulin is elected, applicant is required to elect a specific immunoglobulin, such as IgG as recited in Claim 53..

C) A multivalent MHC fusion complex comprising two or more linked MHC fusion complexes wherein the MHC fusion complex contains specific amino acids that have chemically reactive side chains. Applicant is required to elect a complex modified to include specific amino acids that have chemically reactive side chains, such as His as recited in claim 57.

These species of fusion complexes are distinct because each species has a unique structure with distinct biophysical and chemical properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic in at least one aspect.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy M. DeCloux whose telephone number is 703 306-5821. The examiner can normally be reached on M-F 8:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on 703 308-3973. The fax phone numbers for the organization where this application or proceeding is assigned are 703 305-3014 for regular communications and 703 872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308-0196.
